

KERR-McGEE CORPORATION

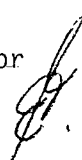

INTERNAL CORRESPONDENCE

TO Managers

DATE July 7, 1986

FROM Evan R. Goltra, M.D.
Corporate Medical Director

SUBJECT Asbestos Seminar

Medical Services is planning an asbestos seminar to be held on October 14-15, 1986 in Oklahoma City. The seminar will cover facility asbestos assessment, worker protection, federal regulations, current abatement industry practice and legal aspects of asbestos abatement (see attached agenda).

This seminar is a result of a changing asbestos abatement environment. On June 20, OSHA promulgated revised general industry and construction industry standards with regard to asbestos abatement and employee exposure. These standards will take effect July 21. These regulations are taking a more stringent approach to controlling occupational exposure to asbestos. Many states are also adopting and implementing stringent asbestos abatement rules. On June 3, Medical Services published an occupational health guideline on asbestos. A revised guideline will be published by mid-July that includes the OSHA revisions. This guideline should be used to develop individual facility asbestos handling procedures. Medical Services has planned this seminar to address the asbestos abatement solution.

A seminar attendees list is provided with this memo. All are expected to attend. Those planning to attend should complete the seminar registration form and return to Dennis Johnson (MT 604) by August 1, 1986.
