CONSULTING: ULTRAMICROANALYSIS • MICROSCOPY • SMALL PARTICLE PROBLEMS • SOLID-STATE CHEMISTRY

27 October 1983

Dr. J. P. Simko, Jr.
Colgate-Palmolive Company
R&D Department
909 River Road
Piscataway, New Jersey 08854

Dear Dr. Simko:

This letter concerns the asbestos analysis of three talc samples labelled 12873, 13080 and 13081. Sample 12877 was found broken when the sample box was opened and could not be analyzed.

The samples were analyzed by transmission electron microscopy. Chrysotile asbestos was detected in all three samples. The examination was not done quantitatively so no amount of asbestos can be determined.

Thank you for consulting McCrone Associates. If you have any questions please do not hesitate to call.

Sincerely,

Deborah P. Palenik

Dear Ms. Palenik:

Attached please find the letter from
Dr. J. P. Simko which was to accompany
the 4 samples he sent you yesterday.

There was a slight mix-up and the letter
was left behind.

Sorry for the inconvenience.

Maryanne Bechtold
Secretary to Dr. Simko

Dear Ms. Palenik:

Enclosed are 4 samples of Talc for analysis for Asbestos by TEM-SAED. Lot Nos. are: 12873, 12877, 13080 and 13081. Lot 12873 has been previously analyzed by your laboratory but we want to check it again.

I understand cost per analysis will be approximately \$350. I am having a purchase order sent under separate cover.

Sincerely,

J. P. Simko, Jr.
