Subject: Consultation with Dr. Krieger & Zhou Yimei

Importance: High

Dear Dr. Fu -

The Consortium Technical Committee again wishes to express appreciation for your time and informative communication during our recent Principal Investigator call. We look forward to sharing these PI discussions on a regular basis, and I will try to arrange the next PI call during the 2nd or 3rd week of March, as you suggest. The Technical Committee respects your attached comments and sincerely appreciates your concerns regarding Zhou Yimei. As Principal Investigator, you are responsible for strategic management of exposure assessment activities and for related Fudan University Human Resources activities. Since the Consortium cannot manage or direct the role of research personnel, API is developing a contract with Dr. Gary Krieger as an advisor to facilitate this situation and to help assure that Zhou Yimei's continued presence and professional conduct are most beneficial to the successful completion of the Shanghai Health Study exposure assessment activities.

Be assured that the Consortium Technical Committee and Dr. Krieger are very much aware of your concerns as Principal Investigator, and that the Technical Committee is giving these issues the greatest consideration and respect. Please contact me, Dr. Cagen, Dr. Twerdok, or Dr. Krieger if any new issues arise... and soon, hopefully, Dr. Krieger will be fully engaged as a Consortium advisor to facilitate and help resolve this situation.

One final thought... have you considered possible dates for Dr. Krieger's visit?

With kind regards - Bruce.

Subject: send it again about the time of conference call

Dear Dr. Cagen

We were pleased to attend the conference call yesterday. Such direct communication is great helpful because from the communication we would know what is our concerns and what is your concerns, and how we can improve the current work of the projects.

Just what discusses yesterday I am concerning if you have decided that Zhou Yimei works here. For us we don't need expert of industry hygiene but an expert who can provide guidance how to improve the exposure assessment under current situation of limited information of history exposure data. That Yimei works here is only waste money. And her personality will make the work of the projects worse. It is my much concern and why I raise this problem so seriously.

For the date of next conference call, you can arrange it on second or third week of March of 2005. As I have not made any detailed schedule on March, you can decide the date of these two weeks. Considering it is too late for the members of Technical Committee, you can arrange the time a little early. For us it would not a problem to go to our office earlier.

With best regards

Fu Hua

主题: PI conference call... 9:00am, January 5, 2005 ?

重要性: 高

Dear Dr. Fu -

Thank you very much for your kind email, and we are grateful to you for offering to meet regularly with the Technical Committee as Fudan University's Principal Investigator (PI) for the Shanghai Health Study. Your direct participation, guidance and feedback will be very beneficial to the Consortium, and I hope that you will find these PI discussions very worthwhile as well. We also very much look forward to receiving a copy of your Fudan University Shanghai Health Study (SHS) Progress Report.

Would you be available to meet with the Technical Committee (TC) at 9:00am on Thursday, January 6th? The TC would join this conference call on Wednesday, January 5th at 8:00pm US Eastern (7:00pm US Central, 5:00pm US Pacific).

Best Regards - Bruce.

Subject: technical committee

Dear Bruce:

We are preparing a report on the Shanghai Health Study, summarizing the progress and current status of the project. The report will also discuss the major technical and management issues and difficulties of the projects and what we can do to solve the problems. We think that the report will be ready in 2 to 3 weeks. We will send you the report as soon as it is finalized. I understand that the other PIs talk to the Technical Committee monthly. I like to have direct communication with the Technical Committee too. I want to be able to talk to the Technical Committee directly about our progress and concerns on a periodic basis. Can you set up monthly or bimonthly conference calls between the Technical Committee members and myself? Because of problems with email between Fudan and API before, I am sending a copy of this email to Otto Wong, so that he can forward it to you if necessary.

Best wishes,

Fu Hua
