Asbestos Felt Labels

Reference is made to the telephone conversations earlier this month concerning the OSHA asbestos warning statements on the labels for asbestos felt supplied by Celotex. We have reviewed this matter and are in agreement that the warning statement may be eliminated from the product label. The asbestos fibers in the felt are considered to be locked in, therefore, do not constitute any inhalation hazard.

We understand that when the existing supply of labels has been depleted, the new wrappers will no longer carry the warning statement.
