14th April, 1958.

Senior Inspector of Mines,
KALGOORLIE.

I have to acknowledge your letter of the 9th April and enclosures covering a visit of inspection to Wittenoom Gorge by Inspector Ibbotson.

Your views on the various points raised appear to me to be correct.

It is not wise to register another name when travelling in an aircraft. Such an action possibly leaves one open to an action of some sort and in the event of an accident it could have very serious repercussions.

It is seldom wise to issue direct instructions on technical matters which are the direct responsibility of the manager.

In the present instance the instructions given are broad in their application or as in paragraph three are qualified.

Some very definite action is necessary to ensure that a reasonable standard is reached and kept in the Wittenoom Mill.

Mr. Ibbotson did briefly report the details of his visit when he was in Perth recently.

Since his report was made through you it is perhaps desirable that you should comment on the points raised - particularly the matter of air-travel.

If you prefer you might send him a copy of this letter for which purpose I enclose a spare copy.

Please advise me of your ^{intentions} instructions.

STATE MINING ENGINEER.
