

221

MENT OF WESTERN AUSTRALIA

Correspondence, and other
the information of those who
concerned with letter to a
writing. For the sake of it

MINES DEPARTMENT,

KALGOORLIE.

20th June, 1962.

District Inspector of Mines,
Mines Department,
PORT HEDLAND.

Herewith correspondence relative to Australian
Blue Asbestos Ltd.,

Will both yourself and your Workmen's Inspector in
future take the necessary action outlined in the correspondence.

When I cool down a bit I might make a quick trip
up and take some direct action myself - you would be informed
in plenty of time beforehand.

After digesting all figures I can only conclude
that the Management is too complacently self satisfied and
that the Ventilation Officer knows absolutely nothing about
ventilation.

Should you desire to take any action at any time,
or require assistance in any action, forward all to me and
be assured of full backing.

R. J. [Signature]
SENIOR INSPECTOR OF MINES.
