The accompanying report contains the results obtained from the acute screening studies with the subject material.

The following data summarize those results:

OLD50 (mg/kg)	DLD50 (mg/kg)	FHSA Skin Irr. (max=8.0)	FHSA Eye Irr. (max=110.0)
2,350	>1,580	5.3	5.1

AROCLOR 1016 is considered to be moderately toxic by ingestion in single doses and by single dermal application. It is also considered to be a severe skin irritant and a slight eye irritant.

Care should be taken to avoid skin contact with AROCLOR 1016. In case of dermal contact, wash affected immediately with water. If irritation persists, consult a physician.

In case of eye contact, flush immediately with large volumes of water.
