CEED Files

Two peak asbestos samples were taken by St. Louis personnel and submitted to CEED for counting. The results are summarized below:

| <u>Sample Identification</u> | <u>Time (min)</u> | <u>Fibers/cc (TWA)</u> |
|------------------------------|-------------------|------------------------|
| Beaterman - #1 Line          | 15                | 0.94                   |
| Beaterman - #7 Line          | 15                | 3.96                   |

These repeat peak evaluations are well below the current and future standards.

If you have any questions, please let us know.
