

A-C AND D-C RELAYS

Type TF and TH – Transistor Sensitive Relays

Standard and Heavy Duty

WHEN ORDERING SPECIFY

• Catalog number

DESCRIPTION

Type TF and TH relays are resistance sensitive relays. Operation of the control relay occurs when the resistance in the sensing circuit is low enough to permit transistor conduction. Standard or heavy duty relay contacts are available.

Standard duty relay is two pole double throw rated at 10 amperes 115 volts. Contact pick up is 10 milli-seconds, drop out 45 milli-seconds. Relay will operate in temperature range of -25°C to $+80^{\circ}\text{C}$.

Heavy duty relay is rated at 600 volts maximum, control circuit only. Contact pick up is 25 milli-seconds, drop out 20 milli-seconds. Relay will operate in temperature range of -30°C to $+50^{\circ}\text{C}$.

	#11 and #7	37V.	---	---	---	0.29	0.11	50,000	300,000
	#11 and #6	37V.	---	---	---	0.28	0.11	110,000	320,000
	#11 and #10	0	0.7V.	0.64V.	---	0.50	0.15	---	---
INVERSE OPERATION									
		With #8 and #11 shorted							
		#11 and #10						450	350

② To insure protection of the transistor a minimum resistance of 2000 ohms should always be in sensing circuit.

TYPICAL OPERATIONAL DATA OF HEAVY DUTY

External Terminal Connections Used	D-c Voltage			Current Thru Term. #8 (Milliamperes)			External Resistance Between Terminals #8 and #7 Affording Operation (Ohms)	
	Open Circuit	Pick Up	Drop Out	Normal	Pick Up	Drop Out	Pick Up	Drop Out
#8 and #7	① 8	Closed Circuit	Open Circuit	4.3	2.0	1.0	3,000	6,000
