from G. E. Wilson location Portland
subject One-Gallon Ready-Mix date July 16, 1976

Several months ago, we issued instructions that all future shipments of one-gallon Ready-Mix were to be made with an asbestos-free formula and that we should put labels to this extent on our cans until we received new one-gallon containers with asbestos-free printing.

Much to my dismay, I have learned that these instructions have not been followed at all times, and I want to advise all concerned that this is a situation that cannot continue in the future. When decisions are made and instructions issued pertaining to product quality and formulas, we expect these decisions to be implemented immediately and without exception. If you have any questions concerning this policy, please check it with me directly.
