OFFICE OF THE EXECUTIVE SECRETARIAT

September 15, 2017

Dear Administrator Pruitt,

Thank you for speaking to the Conservative Action Project (CAP) group on Wednesday morning.

Just a note to say that I regret I was unable to attend in person but very much appreciated your comments listening in via phone.

The clarity with which you shared the current state areas of concentration for the EPA and the difficulties ahead to accomplish your goals was very helpful and insightful.

I look forward to CAP being able to partner with you in the future to accomplish our shared goal of limited government.

Your special contribution to both the President and this nation are greatly treasured.

Please do not hesitate if I can be helpful.

Warmly,

Bob McEwen  
(202) 747-4971

*Thank you for sharing! I am answering your question about the I am always here to help with anything you need. I am always here to help with anything you need. I am always here to help with anything you need.*

# AMERICAN PUBLIC GAS ASSOCIATION

September 27, 2017

Administrator Scott Pruitt  
Environmental Protection Agency  
1200 Pennsylvania Avenue, N.W.  
Washington, DC 20460

Dear Administrator Pruitt:

On behalf of the American Public Gas Association (APGA), I communicate our support for the nominations of Laura Mooney, Regulatory Compliance Manager, Natural Gas for the City of Tallahassee, and Todd Brewer, Manager – Water Quality & Optimization for City Utilities of Springfield, MO, for consideration for appointment to the Environmental Protection Agency's Science Advisory Board (SAB). APGA also supports the nomination of Jim Moore, Utility Market Analyst, for Spire Inc.

APGA is the national association for publicly-owned natural gas distribution systems. There are currently approximately 1,000 public gas systems located in 37 states. Publicly-owned gas systems are not-for-profit, retail distribution entities owned by, and accountable to, the citizens they serve. Public gas systems' primary focus is on providing safe, reliable, and affordable service to their customers.

The SAB plays a critical role in, among other things, reviewing the quality and relevance of the scientific and technical information being used by the EPA. The individuals mentioned above would bring an abundance of expertise and real world experience to the SAB which would greatly benefit the EPA as it moves forward. Their skills, in addition to the experience they possess, can provide critical input into the technical information being utilized by the EPA as the basis for Agency regulations.

We strongly urge you to appoint these individuals to the SAB and thank you in advance for your consideration.

Sincerely,

Bert Kalisch  
President & CEO
