Attention: Mr. H. H. Morino

Dear Mr. Morino:

In response to your letter of September 25 regarding the availability of "Calidria" bagged tile grade asbestos (SG-103) we feel that initially we can supply your plant with 1 car per month of product. Although we cannot predict with certainty the long term availability for new customers, we think that the situation will improve. "Calidria" SG-103 is packaged in either 90 lb. or 70 lb. polyethylene bags and delivered in railroad cars containing approximately 70 tons. The actual car weight depends on the bag weight and railcar size. For your information a price schedule for this product is being enclosed.

I apologize for not sending you a plastic bag used for our tile grade asbestos as promised. I have requested that one be sent to me which I will send to you as soon as it arrives.

Very truly yours,

Gordon L. Dickson
