PERSONAL AND CONFIDENTIAL

June 20, 1967

Mr. L. A. Pechstein, Secretary
The Philip Carey Manufacturing Company
Lockland, Cincinnati, Ohio 43215

Dear Lous:

I am sending you the attached as a personal and confidential piece of information, which I abstracted from the New York Sunday Times of June 18th.

It verifies what Dr. Mancuso was forecasting, and that is, that even the minor use of asbestos may someday be considered as dangerous to the general populace. This is a factor that your company will have prepared to rebut and to solve at some future date.

We will continue to keep you informed of any data that comes to our attention.

Sincerely yours,

John Cantlon
