DENSIFICATION OF ASBESTOPRENE 233 TO
ASBESTOPAC 232

May 14, 1968

Henry Dehr

Attached is a memorandum from L. Winchester regarding various problems encountered in rerolling down Asbestoprene 233 to Asbestopac 232.

The difficulty of being a middle man no longer exists, since you will be receiving the material directly from Smith & Kanzler.

I am sending along the memo, however, so that you may be alerted to some potential problems.
