SHAC Task Force

REFERENCE

TO

: L. Schwab

The 1976 Annual Inspection Report recommended an audit of the central shops with emphasis on "changes to upgrade over-all safety sensitivity, employee indoctrination, safety programming, and the adequacy/use of safety devices. "

Action to correct inspection recommendations has been assigned to SHAC. To speak to the above recommendation, a task force has been appointed consisting of yourself as chairman, John Ringer, George Orum, Jim Ingram and Russ Furley.

Guidelines for conducting audits of manufacturing areas are available in the Biennial Loss Prevention Review Procedure, now being circulated for approval. While parts of this bulletin are applicable, the audit should direct principal emphasis to the items listed in the inspection report.

You have been selected because of your involvement in this subject and because of your demonstrated interest and expertise in safety-related items.

John Tissue will serve as your SHAC contact on this assignment.
