

1939

INDEX

volume 1

A

Accident Statistics: Accident Statistics in the World of Tomorrow (Kossoris), 78-82.
Industry's Experience with Accident Cause Codes (Forney), 83-86.
Value of Accident Statistics (Braun), 502-504.
Acids: Safe Handling of Acids and Caustics in the Metals Industry (Campbell), 441-448.
See also Chemical Industry; Chemicals.
Aeronautical Section: Minutes, 225-238.
Officers, 225.
Aeronautics: Airport Supervision (Mueller), 229-231.
Maintenance of Airplanes for Student Training (Downs), 225-227.
Safety in Service Flight (Giles), 233-235.
Traffic Control—A Vital Factor in Airport Safety (Aldworth), 231-233.
Training of Students (Povey), 227-229.
Transatlantic Flying (Van Dusen), 236-238.
"After the Whistle Blows": Off-the-Job Accidents and What They Are Costing Companies, 530.
Campaigns, 149-162.
See also Public Safety.
Ainsworth, C.: The Inspector—What Manner of Man Is He? 69-72.
Air Conditioning: Air Conditioning and Its Relation to Fire Control (Wheelock), 43-49.
Aldworth, Major R.: Traffic Control—A Vital Factor in Airport Safety, 231-233.
A.S.S.E.—Engineering Section: Minutes, 239-243.
Officers, 239-240.
Annual Meeting of Members, 11-26.
Antimony: 61.
Appley, L. A.: Selling Safety, 584-586.
Arsenic Compounds: 61.
Automotive and Machine Shop Section: Minutes, 245-256.
Officers, 245-246.
Automotive and Machine Shop—Power Press Sections: Joint Session, 252-256.
Awards: See Contests; Rewards.

B

Back Injuries: See Health Hazards.
Bakeries: See Food Industry.
Balmer, A. M.: Health Education Methods Used by Industrial Nurses, 115-117.
Banquet: 27-28.
Barry, T. M.: The Supervisor's Place on the Safety Program—Viewpoint of the Mill Manager, 504-506.
Bateman, G. C.: Aim in Metal Mining Safety, 473-475.
Bawden, C.: Magic and Fire, 52-54.
Beck, E. W.: Progress of Safety in the Rubber Industry, 625-627.
Behley, R. J.: Safety in Construction at the New York World's Fair, 305-310.
Bender, C. G.: The Safe Handling of Packaged Materials, 324-329.
Beverages: See Food Industry.
Biggs, W. P.: Procurement Inspection and Service Inspection of Respirators, 173-179.
Blakeslee, H. N.: Safety in the Petroleum Industry, 549-552.
Blum, F. M.: How to Inspect Cranes, 163-168.
Boilers: The Detection of External Corrosion in Boilers (Royer), 168-172.
Bonus Plans: See Rewards.
Bowen, P. J.: Handling of Flat Rolled Sheets, 432-434.
Braun, F. W.: Value of Accident Statistics, 502-504.
Brick: See Clay Products.
Bryan, H. L.: How Far Can We Go Without Management in Developing and Maintaining a Satisfactory Safety Program? 678-680.
Bulletin Boards: Bulletin Boards and Safety Reminder Displays (Solensten), 372-377.
Burns: Safety Precautions Employed in the Manufacture of Hydrofluoric Acid, 282-283, 295.

C

Cadmium: 61, 217.
Callaghan, C. H.: Safety in Marine Operations—First, Last and Always, 362-363.
Cameron, D.: This Job of Safety, 252-256.
Campbell, R. W.: Safe Handling of Acids and Caustics in the Metals Industry, 441-448.
Carbon Disulfide: Safe Practice in the Viscose Rayon Industry (Chesnut), 686-689.
Carbon Monoxide: 219.
Carbon Monoxide Poisoning (Mayers), 65-68.
Carbon Tetrachloride: Carbon Tetrachloride Problems, 624.
Caustics: Safe Work with Caustic Soda or Sodium Hydroxide, 444-447.
Cement Industry: Analysis of Cement and Quarry Accident Experience (LeGore), 258-261.
Building Safety into the Plant. Discussion, 261.
Cement and Quarry Section: Minutes, 257-271.
Officers, 257-258.
Chant, D. B.: Progress and Activities of the (Paper and Pulp) Section, 479-482.
Chemical Industry: Causes of Chemical Plant Accidents, 296-297.
Educating the Chemical Worker (Severns), 291-292, 295-296.
Safety and Product Quality in a Chemical Industry (Nelson), 635-638.
Safety in the Chemical Industry. Panel Discussion, 281-283.
Safety Precautions Employed in the Manufacture of Hydrofluoric Acid, 282-283, 295.
Safety Training of Undergraduate Chemical Students (Zoerb), 292-294, 296-298.
The Selection of Safe Metals for the Design of Chemical Equipment (Faragher), 276-279, 294.
See also Chemicals.
Chemical Section: Contest, 279-281.
Minutes, 273-298.
Officers, 273-274.
Chemicals: Safe Handling of Acids and Caustics in the Metals Industry (Campbell), 441-448.
Safe Handling of Metallic Sodium (Dunning), 283-287, 294.
Chesnut, W. H.: Safe Practice in the Viscose Rayon Industry, 686-689.
Chromic Acid: 61.
Clark, H. S.: Safety Problems Faced in Bituminous Coal Mines, 451-454.
Clay Products: Is There Enough Silica in the Average Fire Brick to Affect Workers Seriously? 143.
Clothing: Do Companies Make an Effort to Standardize Work Clothing? 521-522.
Policy of Press Operators Wearing Gloves, 579-580.
See also Leggings.

Colleges and Universities: Safety Training of Undergraduate Chemical Students (Zoerb), 292-294, 296-298.
Construction Industry: Refinery Construction Problems (Ullrich and Heyden), 543-546.
Safe Dredging Operations (Shuman), 301-305.
Safety Features in the Construction of the Chickamauga Dam (Schlemmer), 310-313.
Safety in Construction at the New York World's Fair (Behley), 305-310.
Safety Lowers Cost on Construction Projects (Fleck), 313-317.
What Are Our Accident Statistics for 1938? (Soule), 300-301.
Construction Section: Minutes, 299-317.
Officers, 299-300.
Contests: Awards Versus Rewards (Metzger), 123-126.
Chemical Section, 279-281.
Data on the Paper Industry Safety Contest (Dowd), 515-516.
Marine Section, 342.
Metals Section, 415-416.
Paper and Pulp Section (DeBlois), 516-517.
Petroleum Section. 552-553.
Presentation of the Paper Industry Award (Dowd), 518.
Public Utilities Section, 595-596.
Rubber Section, 634-635.
Should Safety Stunts and Contests Be Included in the Accident Prevention Program? 404-405.
See also Rewards.
Conway, J. M.: Management's Attitude on Industrial Nursing Service, 117-121.
Costs and Money Savings: Effectiveness of Safety Work, 551-552.
Cranes: How to Inspect Cranes (Blum), 163-168.
Safe Crane Maintenance (Schnure), 437-440.
Safe Crane Operations (Darbaker), 434-437.
Curtis, F. W.: Investigation of Accidents Involving Maintenance of Equipment—Locomotives, 666-668.

D

Dams: See Construction Industry.
Darbaker, J. M.: Safe Crane Operations, 434-437.
Darr, H. W.: How to Handle Safety Effectively with Management, Supervisor and Men, 417-421.
A Safety Program That Works, 382-386.
Davis, Dr. P. A.: Dusts in the Rubber Industry, 638-641.
DeBlois, L. A.: Presentation of National Safety Council Trophies (Paper and Pulp Section), 516-517.
Demolition: Safety Lowers Cost in Construction Projects (Fleck), 313-317.
Dermatitis: See Health Hazards.
Detectors: See Gases.
Dickie, A. J.: Publicity—A Servant to Safety, 364-365.
Dietz, A. M.: Knife Cuts, 633-634.
Dooley, C. R.: How Can Job Analysis and Merit Rating Programs Help Solve Accident Prevention Problems? 508-515.
Dough Machines: See Food Industry.
Dowd, A. Scott: Data on the 1938-39 Paper Industry Safety Contest, 515-516.
Presentation of the Paper Industry Award, 518.
Downs, G. M.: Maintenance of Airplanes for Student Training, 225-227.
Dredging: Safe Dredging Operations (Shuman), 301-305.
Drinker, Dr. C. K.: Remarks on Pole-Top Resuscitation, 602-605.
Dunning, J. W.: Safe Handling of Metallic Sodium, 283-287, 294.
Dusts: Dusts in the Rubber Industry (Davis), 638-641.
Health Hazards in the Woodworking Industry (Sayers), 694-696.
Is There Enough Silica in the Average Fire Brick to Affect Workers Seriously? 143.

E

Economics of Safety: Accident Costs, 551-552.
The Dividends of Accident Prevention (Holmes), 353-356.
Record of Bethlehem Steel Co., 421.
Safety—A Formula for Human and Industrial Progress (Whitney), 262-264.
Safety Lowers Cost on Construction Projects (Fleck), 313-317.
Education of Workmen: Educating the Chemical Worker (Sevrens), 291-292, 295-296.
Educational Problems in Manufacturing Plants (Rust), 533-537.
Foremanship Training—the Fundamentals and Effective Methods Involved (Gardiner), 194-198.
Selection, Training and Supervision of Seasonal Employees (Millican), 618-622.
The Technique of Training New Safety Men (Risinger), 554-557.
Eidenbach, H.: The Safety Movement as Related to the Legal Profession, 345-347.
Elevators: Factors of Safety in a Factory Elevator Other Than Inspection (Reppert), 395-399.
Eliminating Mechanical Causes of Accidents Session: Panel Discussion, 29-41.
Employees: How Can a Safety Program Be Made the Basis for Building Good Will Among Employees? 422-424.
The Human Side (Pavlis), 506-508.
Employees' Meetings: Group Safety Meetings, 420-421.
Employees—Selection: Selection, Training and Supervision of Seasonal Employees (Millican), 618-622.
Employees Training: See Education of Workmen.
Engineering: Accident Factors (Self), 367-372.
Coordination of Engineering and Safety (Hassler), 409-412.
Engineers: How to Handle Safety Effectively with Management, Supervisor and Men (Darr), 417-421.
Safety Training of Undergraduate Chemical Students (Zoerb), 292-294, 296-298.
Engine Rooms: Refrigeration Engine Room Hazards and Their Elimination (Peters), 612-615.
Engines: Problems in Starting Oil Field Gas Engines (Taylor), 537-539.
Evans, C. Jr.: Safety Problems Faced in Anthracite Coal Mining, 455-457.
Executives: See Management.
Exhibits: Bulletin Boards and Safety Reminder Displays (Solensten), 372-377.
List of Exhibitors of Industrial Safety Equipment, 715-718.
Safety in Construction at the New York World's Fair (Behley), 305-310.
Explosives: Safe Storage and Handling of Explosives (Fisher), 264-267.
Eye Protection: See Goggles.

F

Fairs: See Exhibits.
Falls—Persons: Falls and Their Prevention (Weimer), 630-633.
Falls of Persons (Granniss), 333-334.
What Can Be Done to Prevent Falls on Floor Surfaces of Vitrified Brick? 399-401.
Faragher, Dr. P. V.: The Selection of Safe Metals for the Design of Chemical Equipment, 276-279, 294.
Fatigue of Metals: Detection of Flaws in Steel and Steel Parts (McCune), 241-243.
Faust, J. T.: Carrying the Safety Message to the 92 per cent, 87-90.
Federal Departments: Federal Aim in Mine Safety (Finch), 461-463.
Fennell, D. D.: The American Railroads' Contribution to Safety in America, 671-675.
Unity in the National Safety Program, 11-15.

Ferric Oxide: 217.
Field, Com. R. S.: Recent Improvements in American Ships and Personnel, 359-362.
Finch, J. W.: Federal Aim in Mine Safety, 461-463.
Finch, R. A.: Safety in the Use of Edge Tools, 704-707.
Fire Control and Prevention Session: 43-54.
Fire Protection: Air Conditioning and Its Relation to Fire Control (Wheelock), 43-49.
Fire Safety—A Panel Quiz, 49-52.
Magic and Fire (Bawden), 52-54.
First Aid: First Aid for Quarry Workers (Thompson), 269-271.
First Aid Technique (Subin), 334-337.
First Aid Training, 152-154.
Fisher, C. H.: Safe Storage and Handling of Explosives, 264-267.
Fleck, A. B.: Safety Lowers Cost on Construction Projects, 313-317.
Floors: Slippery Floors in Canning Industry, 331-332.
Treatment of Floors and Stairways to Prevent Slipping, 400-401.
What Can Be Done to Prevent Falls on Floor Surfaces of Vitrified Brick? 399-401.
Food Industry: Canned Goods (Mathews), 330-332.
Dough Machines, 36-37.
The Safe Handling of Beverages (Wilson), 329-330.
The Safe Handling of Packaged Materials (Bender), 324-329.
Syphilis Control and Its Relation to the Food Industry (Russell), 321-324.
Food Section: Minutes, 319-337.
Officers, 319-321.
Foremen: Foremanship Training—the Fundamentals and Effective Methods Involved (Gardiner), 194-198.
General Machine Shop Hazards and Correction (Sain), 246-249.
How Can Job Analysis and Merit Rating Programs Help Solve Accident Prevention Problems? (Dooley), 508-515.
How to Deal with the Foreman Who Maintains that Accidents Are Bound to Occur, 521.
The Human Side (Pavlis), 506-508.
The Supervisor's Place on the Safety Program—Viewpoint of the Mill Manager (Barry), 504-506.
Training Supervision in Accident Prevention (Loge), 641-644.
Formaldehyde: How Much Formaldehyde Represents Toxic Proportions? 145-146.
Forney, R. L.: Industry's Experience with Accident Cause Codes, 83-86.
Frechtling, Dr. L. H.: Industrial Hernia and Its Control, 103-108.
Fumes: See Gases.
Fumes, Gases and Vapors Session: 55-68.

G

Gardiner, G.: Foremanship Training—the Fundamentals and Effective Methods Involved, 194-198.
Gases: Dangerous Concentrations of Sulphur Dioxide Gas, 146.
Metal Fume Poisoning (Sander), 60-64.
Modern Methods of Gas Detection and Control (Meiter), 55-60.
Specific Hazards of Welding in Confined Spaces (Stieglitz), 214-223.
Gasoline Plants: See Petroleum Industry.
Gernon, J. L.: Safety from the Viewpoint of the State Department of Labor, 392-395.
Giberson, Dr. L. G.: Man's Mental Attitudes, 186-193.
Gibson, G. H.: Wood Shapers, 703-704.
Giles, Major B. M.: Safety in Service Flight, 233-235.
Gillies, D. B.: Safety and Happiness, 460-461.
Gloves: See Clothing.
Gnadinger, O. F.: The Investigation of Accidents Involving Maintenance of Way, 663-666.
Goggles: Should Goggles Be Worn by Punch Press Operators? 569-572.
Should Goggles Be Worn by Wood Room Employees? 525-526.
Gormley, M. J.: Some Practical Aspects of Safety, 661-663.
Governmental Safety Service in Industry Session: 69-92.
Grade Crossings: Grade Crossing Accidents, 654-658.
Granniss, E. R.: Falls of Persons, 333-334.
Gray, C. R., Jr.: Safety Today and Tomorrow on American Railroads, 645-650.
Gross, Dr. E. R. and Klauder, Dr. J. V.: Dermatitis Control—Proper and Improper Use of Cleansing Agents, Soap and Other Detergents, 93-103.
Guards: Eliminating Mechanical Causes of Accidents Session. Panel Discussion, 29-41.

H

Hand, R. F.: The Employer's Attitude Toward Safety, 365-367.
Handling Materials: Handling of Flat Rolled Sheets (Bowen), 432-434.
Handling of Materials (Welch), 627-630.
Safe Handling of Acids and Caustics in the Metals Industry (Campbell), 441-448.
The Safe Handling of Packaged Materials (Bender), 324-329.
Hands: Hand Injuries Among Men of Long Experience and New Employees, 528.
Hand Injuries, Their Cause and Prevention (Plzak), 496-501.
Harper, A. B.: No Secret Formula for Safety, 689-691.
Hartman, R. M.: Discussion of Rehabilitation Procedures, 471-473.
Hassler, J. M.: Coordination of Engineering and Safety, 409-412.
Hatch, A. R.: Safety and Manila Rope, 386-388.
Health Hazards: Back Injuries from the Point of View of the Safety Director (Strong), 488-494.
Back Injuries in the Paper Industry—The Medical Viewpoint (MacLaren), 482-488.
Carbon Monoxide Poisoning (Mayers), 65-68.
Carbon Tetrachloride Problems, 624.
Dangerous Concentrations of Sulphur Dioxide Gas, 146.
Dermatitis Control—Proper and Improper Use of Cleansing Agents, Soap and Other Detergents (Klauder and Gross), 93-103.
Dusts in the Rubber Industry (Davis), 638-641.
Engineering Control of Occupational Diseases and the Small Plant, 142.
Engineering Phases of Occupational Disease Control, 137-139.
Hand Injuries, Their Cause and Prevention (Plzak), 496-501.
Health Hazards in the Woodworking Industry (Sayers), 694-698.
How Much Formaldehyde Represents Toxic Proportions? 145-146.
Industrial Hernia and Its Control (Frechtling), 103-108.
Is There Enough Silica in the Average Fire Brick to Affect Workers Seriously? 143.
Metal Fume Poisoning (Sander), 60-64.
Metal Spraying, 146-147.
Occupational Disease Control Program, 135-147.
Oil Dermatitis, 144-145.
Protective Creams and Lotions, 139-140.
Safety Precautions Employed in the Manufacture of Hydrofluoric Acid, 282-283, 295.

Specific Hazards of Welding in Confined Spaces (Stieglitz), 214-223.
See also Injured Workers.
Health Service in Industry Session: 93-108.
Health Supervision: Improving the Health of Industrial Workers (Shafer), 111-114.
Medical Service in the Petroleum Industry in 1939—Report of a Survey (Long), 539-543.
Herges, E. P.: Safety Engineering for Stevedoring Operations, 351-353.
Hernia: See Health Hazards.
Heyden, E. B. and Ullrich, W.: Refinery Construction Problems, 543-546.
Holden, Capt. E. C., Jr.: Safety Movement as Related to Ship Operations and Marine Insurance, 347-351.
Holmes, C. E.: The Dividends of Accident Prevention, 353-356.
Housekeeping: Industrial Housekeeping, 37-41.
Huff, C. E.: Frangible Rubber Discs for Pressure Vessels, 287-291, 294-295.
Human Element: See Personal Factors.
"Human Side of Safety" Series of four lectures, 181-202.
Hydrofluoric Acid: Safety Precautions Employed in the Manufacture of Hydrofluoric Acid, 282-283, 295.
Hydrogen Sulfide: Safe Practice in the Viscose Rayon Industry (Chesnut), 686-689.

I

Ice: See Refrigeration.
Industrial Nursing Session: 109-121.
Injured Workers: Alleged Injuries, 492-494.
Inspection: The Detection of External Corrosion in Boilers (Royer), 168-172.
How Should a Factory Inspection Be Made? (Keown), 74-78.
How to Inspect Cranes (Blum), 163-168.
The Inspector—What Maner of Man Is He? (Ainsworth), 69-72.
Procedure to Be Followed in Inspecting Mechanics' Tools, 523-524.
Procurement Inspection and Service Inspection of Respirators (Biggs), 173-179.
What Training Should a Factory Inspector Receive? (Zimmer), 73-74.
What Types of Press Inspection Are Most Effective? 574-576.
Inspectors Session: See Safety Inspectors Session.
Investigation of Accidents: Accident Factors (Self), 367-372.
Investigation of Accidents Involving Maintenance of Equipment—Locomotives (Curtis), 666-668.
The Investigation of Accidents Involving Maintenance of Way (Gnadinger), 663-666.
Investigation of Accidents Involving Stations and Stores (Larson), 670-671.
Maintenance of Equipment—Cars (La Fountaine), 668-670.
Who Should Investigate Accidents? Why? How? 401-403.
Iron and Steel Industry: See Metal Industries.
