PABCO INSULATIONS SALES POLICY

Pabco insulation products are sold only through franchised Pabco Engineering Service Units, who have been selected for technical competence, financial strength, and highly skilled crews. These distributors maintain sizeable local stocks of Pabco insulation materials and accessories, and are able to fill your requirements promptly.

For your protection, our Engineering Service Units offer competent application knowledge. It is vitally important that qualified personnel apply these superior products, since the finest materials will not provide ultimate performance unless properly applied.

For the name of your local Pabco Engineering Service Unit, contact our nearest sales office listed on the opposite page.

OTHER PABCO INSULATION PRODUCTS

ALUMI-SHIELD is "Precision Molded" Caltemp pipe insulation with a factory-applied aluminum jacket. The inside surface of the jacket, kraft laminated to the aluminum with a polyethylene vapor barrier. Alumi-Shield is especially recommended for outdoor installations in power generation and process industries operating at temperatures to 1350F.

CALTEMP is also "Precision Molded" for temperatures to 1350F. It covers the bulk of heat insulation requirements with a range of economy and safety of 100° to 1350°. It is especially recommended for insulating requirements where weathering and vibrations are a problem. SUPER CALTEMP, produced in blocks only, is now available for temperatures to 1500 F.

PRASCO 15-C, for temperatures to 1500F on heated piping and equipment. This insulation is composed of diatomaceous earth and a bonding agent mixed to the proper proportions to withstand high temperatures. Use Prasco 15-C alone or in combination with "Precision Molded" 85% Magnesia or Caltemp Insulation.

PRASCO 19-C, for temperatures to 1900F. Available in block form only. This is a diatomaceous silica type of high-temperature material, using calcined diatomaceous earth with a suitable binder and blended with asbestos fibers. Use Prasco 19-C alone or in combination with "Precision Molded" 85% Magnesia or Caltemp. Prasco 15-C and 19-C are also supplied in curved or radius blocks.

CEMENTS, for Caltemp, 85% Magnesia and Prasco 15-C, are available made of the same material as the insulation, but in powdered form. These cements are mixed with water to the proper consistency for trowel application. Pabco F-I Hydraulic Setting Cement is also available for all types of insulations for temperatures to 1200F. This is a finishing and an insulating cement that is smoother, goes on easier, and offers up to 25% greater coverage than comparable cements.

*PABCO-GLAS INSULATION for every industrial and commercial insulation need. Pabco offers one of the most complete lines of glass insulations in the industry. This wide selection of types, sizes and densities permits the designer to obtain a desirable combination of cost, performance and appearance.

PAB-FLEX ASBESTOS-CEMENT SHEETS, for a variety of industrial and commercial applications; for a protective facing over cold storage room insulation; for a weatherproof facing over insulation on outdoor tanks and vessels; for cooling towers; for fume hoods and ducts.

INTEGRAL JACKETING, made to your specifications as a factory-applied weatherproofing jacket. Jacketing also available in rolls or cut to your job requirements.

*Available only in the West.

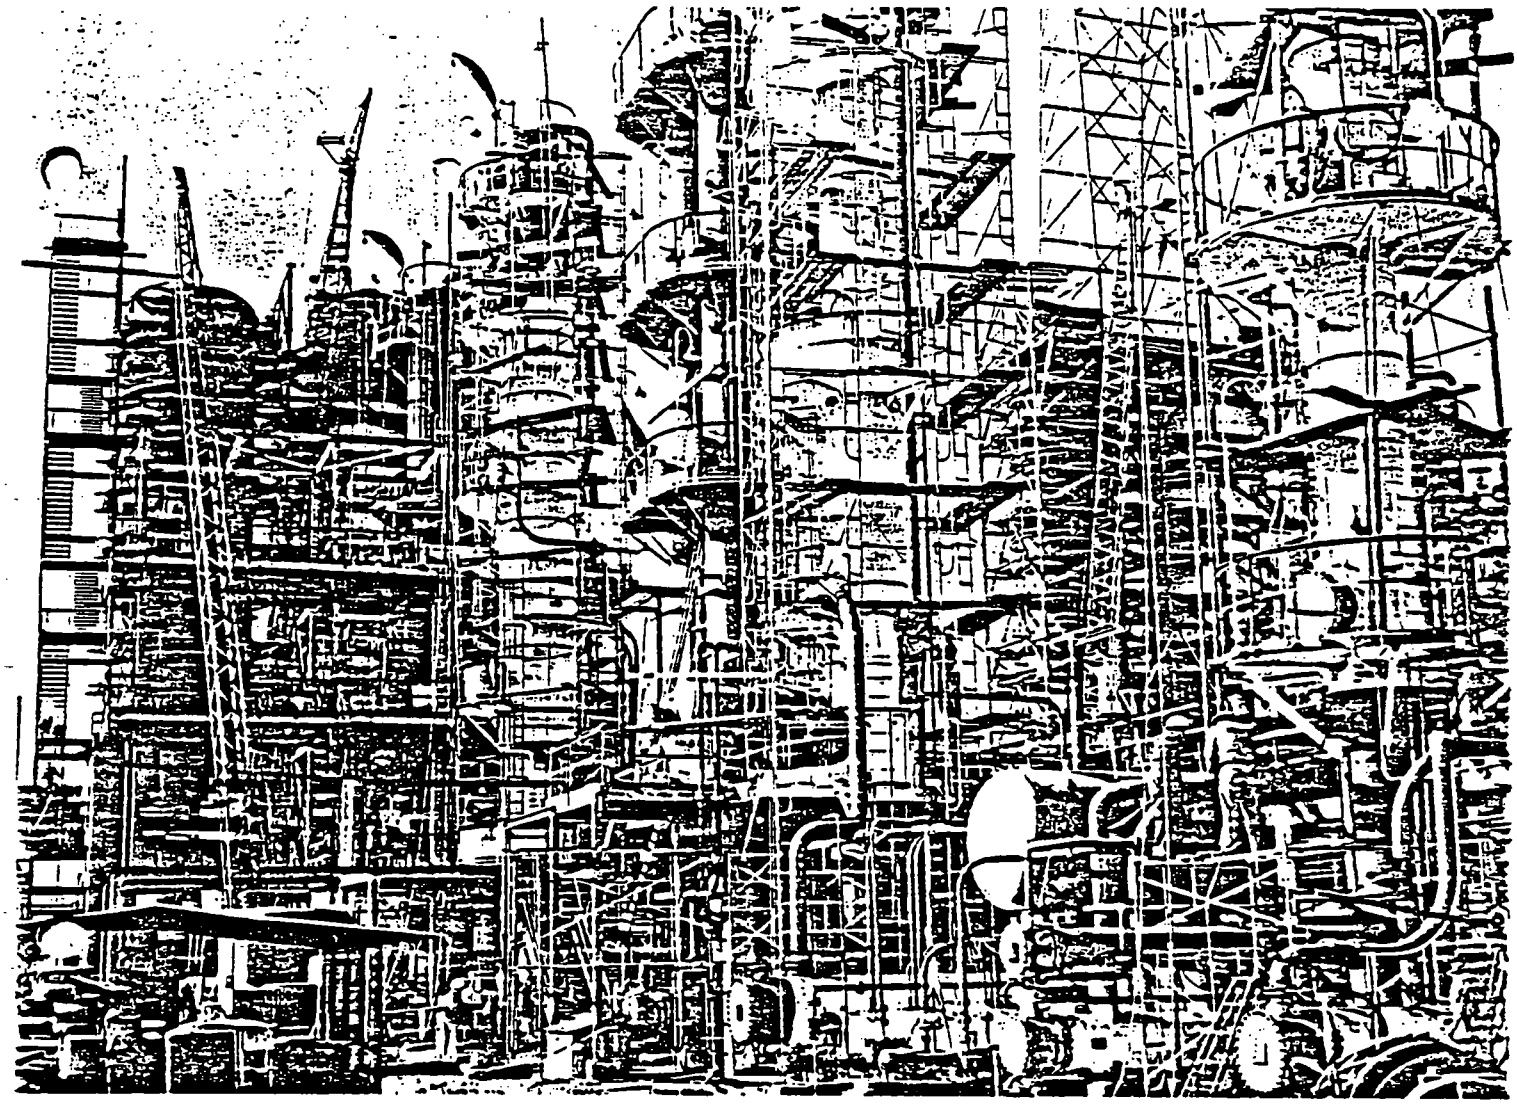

For case histories or engineering consultation, contact the Manager, Industrial Products.
