PREFACE

Medical and public health interest in polychlorobiphenyls (PCBs) in the United States was meager before 1970. Until Soren Jansen of Sweden discovered in 1966 that PCBs were confused analytically with chlorinated hydrocarbons in an eagle, the toxicology literature on PCBs was limited to articles on patents, industrial aspects and hygienic implications. Although the first serious food poisoning episode attributed to PCB's occurred in Japan in 1968, it was not reported in the Japanese literature until July 1969, and remained generally unknown in the United States until 1971.

The expanding literature on PCBs since 1970 has reflected the realization of the importance of these substances as environmental pollutants. The analytical confusion of PCB with DDT and other chlorinated hydrocarbon pesticides prior to 1969 is of special interest. The concern over PCBs was heightened in 1971 by the recognition of gross contamination of certain animal feeds and of trace contamination of some human foods.

The 870 articles cited in this bibliography were collected from August 1969 to January 1972. Every effort has been made to cite each reference as completely as possible. Where titles were not yet available, an indication of contents was given in lieu of the actual title. This bibliography is believed to cover the majority of articles in all languages on PCBs available to us through January 1972.

Such a bibliography is usually published as an integral part of a state-of-the-art review; in this instance, however, the bibliography is being released separately (as Part I) because of the urgent need of various industrial, scientific, and health professionals for information resources in the PCB field. The state-of-the-art review will be published as Part II in approximately three months.

The following publications served as principal sources of the PCB references used in this bibliography:

Chemical Abstracts 1967 - 1971
Biological Abstracts 1965 - 1970
Health Aspects of Pesticides Abstract Bulletin 1967 - 1971
Index Medicus 1965 - 1971
Pesticides Monitoring Journal 1960 - 1971
Pollution Abstracts 1970 - 1971
Toxicity Bibliography Jan 1968 - Dec 1970
Toxicology and Applied Pharmacology July 1970 - May 1971

MON-MT-008681

Users of the National Library of Medicine services who wish to keep up-to-date with respect to PCBs should know that articles concerning these ubiqutons compounds are currently being indexed in Index Medicus under the MeSH heading, "Biphenyl Compounds." A MEDLARS, MEDLINE, or AIM-TWX search can be performed using the machine search term, "Polychlorobiphenyl Compounds" for the 1972 data base and "Biphenyl Compounds" for the pre-1972 data bases.

Comments and notification of articles missing from this bibliography will be welcomed by the author and incorporated, as far as possible, in the review section (Part II).
