Attn: Mr. R. W. Norman

Dear Sir:

REQ. CE-70-EP-11
YOUR QUOTATION 70-2481
OUR P.O. 579-2

This is to advise that we have accepted your quotation dated March 13th and will confirm this by purchase order from our New York Purchasing Department on Order 70-579-2 as referenced above. Due to the mail strike we are authorizing you to proceed now against this order.

Your proposal includes support feet and specifies 1/2" Fiberfrax gaskets in instances. We feel this is a typorgraphical error.

We wish you to wire your revised proposal data to Mr. J. Wist, New York Purchasing, to take into consideration the following changes covered by our attached list of approved drawings to be used for fabrication and request approval prints as quickly as possible for our review.

1. Delete the support feet on conveyor troughs.

2. All gaskets to be 1/8" asbestos as shown on drawings instead of Fiberfrax. Temperatures on this installation do not require this.

3. Changes in lengths of conveyors 9, 11 and 12 and the addition of conveyor 13 detailed on drawing EP-15987

All reference should be made to include drawings as follows:

Dwg. EP-15950
EP-15971
EP-15975
EP-15979
EP-15980
EP-15990
EP-15987

We have included two sets of drawings.

Very truly yours,

A. O. MARSH, Jr.
Chief Design Engineer
