

Use AROCLORS in Your Stucco Paints

Thanks to Monsanto Aroclors, modern 1254 high-styrene-butadiene-base stucco paints are literally performing wonders. These new paints have far greater flexibility than older paints—because they use products like Aroclor 1254 as a plasticizer. They also have greater alkali resistance, improved weather resistance and greater all-round durability—because they use products such as Aroclor 5460 as a fortifier.

For more information ask for Technical Bulletins P-124 and P-126 from MONSANTO CHEMICAL COMPANY, Phosphate Division, 1700 So. Second Street, St. Louis 4, Missouri.

Aroclor: Reg. U. S. Pat. Off.

DISTRICT SALES OFFICES: Birmingham, Boston, Charlotte, Chicago, Cincinnati, Cleveland, Detroit, Los Angeles, New York, Philadelphia, Portland, Ore., San Francisco, Seattle, Twin Cities. In Canada, Monsanto Canada Limited, Montreal.
