To: L. D. Adcock

Xc: Cy Barrios
C. Wayne Landry

"D" SHIFT SAFETY MEETING - MAY 1977

Present:	Joe Debetaz	Mike Lipscomb
	Wayne Landry	Ricky Vaughn
	Cliff Thibodeaux	Ernest Lee
	Jesse Theriot	Elmer Bourgeois
	Glenn Rachel	John Cedotal
	John Lemoine	Larry Sam
	Art Bourg	John Mathis

Absent: Huey Young - Vac.
Galen Waguespack - Vac.

Art reviewed the minutes of the last APC Committee meeting. We were informed that the last couple DI's were due to hot condensate and operators were cautioned to be careful when using. Also, tennis shoes will not be worn in shop or operating area.

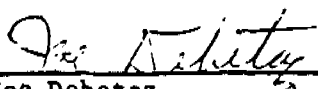

Reviewed letter from Cy on safety standard violation of hooking fire hose to deluge gun. Informed operators of new process water hookups to hook hoses to instead of guns.

Reviewed letter from C. W. Landry on upkeep of acid suits and hoods. "C" Shift will look after the locker and check condition of gear. Operators were asked to do their part to keep gear clean.

Reviewed injury report on lab load man. He was sprayed with TCP when bolts bottomed out on block valve on the load line, causing loose flange and gasket to blow. Also, reviewed remainder of incident reports.

* Reviewed letter from Linda on survey for audio deficiency of personnel in Solvents. Reminded operators to wear their ear protection when entering areas designated as high noise pollution areas. Cliff asked about the efficiency of the new type ear plugs. He was informed that they work fine but operator needs to be sure his hands are clean when pulling and reinserting the plugs...could cause ear injury if chemicals get on soft rubber that sets deep into the ear cavity.
