ST. LOUIS

Mr. Keatherly

AMACONDA WIRE & CABLE

The Anniston Laboratory will set up a procedure for making a sediment test on Arcolor 4465 promptly. The test will be under the temporary supervision of the Anniston Research Department.

Mr. Barker will issue a monthly report concerning all samples under test.

We do not have all of the materials on hand which are necessary for the test. We will begin the test as soon as all of the necessary materials can be assembled.
