Subject: water fountains

Dear Madam/Sir,

Drinking fountains provide a service to residents and tourists who need a drink of clean water. They provide an alternative to sodas and other high-sugar drinks, and save money spent on recycling and waste stream.

These days I am working on drinking fountains and WC mapping project. With the help of MapTaps app found on Google Play, everyone can add new taps and WC by just clicking the "+" icon. A picture is taken from the exact place, and if authorized by admin, it is added to Google Maps on <https://maptaps.org> site and on the MapTaps app.

Do you wish to help me protect our planet?
