

YOUR HOUSE NEED PAINT? ... THEN CONSIDER—

BOTH ends of the PAINT BRUSH

*You need a skilled painter on one
end—pure lead paint on the other*

TO weather-proof your house, your first need is a master painter . . . a craftsman skilled in paint mixing and application. Your second is—pure lead paint.

These two age-old partners insure a superior paint job—one that always saves you money in the end. Lead paint, made with Dutch Boy white-lead, does not crack or scale. With it the painter applies a protective film—tough, elastic, wonderfully long-lasting. And there's no old, scaly paint to be burned or scraped off when repainting time finally does arrive.

A scraping job is expensive . . . often it costs as much as the actual painting work. Avoid this unnecessary expense by employing a master painter—and Dutch Boy white-lead.

*Write our nearest branch for
new booklet on painting—“The House We Live In”*

*Sold by leading
paint dealers*
