Division of Industrial Hygiene
State of New York
Department of Labor
221 Erie Blvd., East
Syracuse, N. Y.

Gentlemen:

Our records indicate that a representative of your division who had some connection with the U. S. Public Health Service made a survey of certain parts of our Palmyra factory in the spring of 1946, including dust counts in our Textile Department.

We never received any report on the findings of this survey. We are at present engaged in a study of dust conditions in our Textile Department, and it would be extremely helpful if we could have a copy of the report of your 1946 survey. We are especially interested in the historical aspects of dust conditions in Textile Department.

It will be appreciated if you will furnish us with a copy of the 1946 report. If there is any charge in connection with the furnishing of a report, please let us know.

Very truly yours,

THE GARLOCK PACKING COMPANY

J. R. Alsdorf
