DOCUMENT DESCRIPTION: Govt Inspection Report from Under
Secretary for Mines

(12)

Copied from M.D. 618/43

SECRETARY FOR MINES

Inspector Boyland visited the Leeson Colliery on the 19th and 20th January. His report is at page 139, file 1301/43. It is herewith noted that he has requested the Company to erect the milling section and install exhaust fans and motors. I personally feel that an instruction as regards matters then a request, although, as the Inspector, it will be difficult to secure the necessary material.

A further report from the Inspector, dated at page 144 on the same file states that nothing has been done to improve the ventilation and that the ventilators are still in the same state. I propose to recommend a prosecution if there is not immediate improvement in this matter; and I propose to continue the recommendation.

At page 141 the report of Mr. T. Powell, a surveyor, is given. It is hoped that this appointment of an Officer. It is hoped that this appointment will have the desired effect.

I propose to have this matter followed up and to take whatever steps may be necessary to enforce compliance with the Regulations.

1st March, 1950.
JSF/S.
