REPORT OF SPECIAL MEDICAL EXAMINATION

Purpose of the Examination:

To determine Mr. Goans' present physical condition with special reference to his reported pneumoconiosis attributed to exposure while doing insulation work over a period of 43 or 44 years.

The patient states that he has worked as an insulator since a young man, less than 18 years of age, during the period of World War I. He says that over these years he has used many different kinds of insulating materials particular asbestos and corrugated paper during early years and during the last four years or so has been concerned mainly with fiberglass insulation. He says that he has worked in all kinds of construction including ships and public buildings. Usually the work has involved the insulation of pipes and boilers rather than walls. Frequently the work involved insulation of both hot and cold air duct lines. He says that frequently there was dust and sometimes he was required to work in relatively closed poorly ventilated spaces.

He considered himself to be well and had no complaints until recently. He says that about three or four years ago his union made arrangements to have members take x-rays once a year at the Kaiser Hospital in Oakland, California. He believes that his first x-ray was made about three years ago and that he had never had an x-ray of the chest made before. He was told at that time that there was evidence of some dust in his lungs, at first only "on the bottom of the lungs" but in more recent years that this was worsening and that it involved not only "the bottom" but also "the top of the lungs". When informed that there was progressive disease he went to see a physician in San Francisco, Doctor Walter Kolman (3490 - 20th Street). Doctor Kolman confirmed the diagnosis and advised Mr. Goans to discontinue his work and to apply for disability benefits. The patient states that he has been eager to continue working if possible until the usual retirement age of 65 years but, of course, he is not willing to run any risk of serious pulmonary difficulty. He says that it is not possible to escape all exposure to dust in his occupation and that he would not be able to find a job in this industry that does not involve dust exposure.

NOV 6 1963

OAK LEGAL

Page 2: October 14, 1963
From: H. Corwin Hinshaw, M.D.
To: State Compensation Insurance Fund
Subject: Robert O. Goans

He says that he had had no significant symptoms during previous years and he recites an instance of excessive physical activity about 1936 in connection with a deer hunting expedition he was forced to run for a distance of about one and one-half miles and this was done without serious difficulty. He says that he worked at an altitude of about 6,000 feet in the vicinity of Reno about two or three years ago and he does not recall any difficulty breathing at that altitude. Since learning of his x-ray changes he has noted cough and expectoration, especially during the last year or two, shortness of breath also mostly during the past year or two. He says that if he walks slowly for a moderate distance he would not have any shortness of breath but if he attempted to walk rapidly or did some other unusual effort that he would become short of breath and stop. He has no chest pain on such occasions. He says that he also has developed a cough in the last two years or so. He coughs up some sputum which is never bloody and apparently is never green or yellow pus. He has not done any work at all the last nine months or so.

Present Symptoms:

He says that his general health and strength would be satisfactory except for his lung difficulty. He does not believe he has lost any weight in the last year although his present weight is about 10 or 15 pounds below his usual weight.

Respiratory Symptoms - He says that he has a mild cough in the morning with expectoration of clear sputum. He has never expectorated blood. He has never had asthmatic symptoms such as wheezing, no chest pain. He has moderately severe shortness of breath on any unusual activity as described previously. He is not particularly prone to develop respiratory infections.

Cardiac Symptoms - He has never had a heart attack. He has no anginal pain, no palpitation, no swelling of the ankles.

Gastro-intestinal Symptoms - His appetite is satisfactory, no abdominal pain, no constipation or diarrhea, no difficulty swallowing.

Genito-urinary Symptoms - No frequency, no nocturia, no pain, no obstruction to the flow of urine or any other symptom to suggest kidney or bladder disorder.

Eyes - He says that he has a cataract in his right eye. The left eye gives satisfactory vision. His hearing is satisfactory.

No symptoms related to the nose, sinuses, etc.

Neuromuscular, Skeletal, Central Nervous System - No paralysis, no weakness, no bone or joint symptoms, no central nervous system disorders.

Personal Habits:

He smokes 20 to 30 cigarettes a day and has all of his adult life. He drinks regularly. He says that he always has a "shot" before breakfast and sometimes drinks as much as a half a pint a day. He says that he has never become intoxicated and does not go on drinking sprees but drinks these amounts on a regular basis. He has been married twice. His first wife bore him one child but he does not know whether that child is still living. He has been married to his present wife for 38 years. They have had no children. He says that his wife has suffered from colitis. He does not know about the health of his mother and father, having had no communication with them since 1926. They were living in the

OK LEGAL

To: State Compensation Insurance Fund
Subject: Robert O. Goans

State of Missouri. He is not sure how many brothers or sisters he has but thinks there were seven or eight in the family. He has not had any contact with them for many years.

Past Medical History:

In 1950 he had an injury which included a fracture of his left heel and was in Sutter Hospital in Sacramento. He does not know whether he had an x-ray of his chest at that time or not. His physician was Doctor Horn. He also sprained his right wrist but this did not require hospitalization. He has never been in a hospital in any other circumstance. He has never been in military service. He has not had any serious childhood diseases. He has never been hospitalized for any other condition. He doesn't believe he has ever had pleurisy, pneumonia, jaundice, rheumatic fever, malaria, syphilis, other accidents or injuries aside from those mentioned, no hay fever, asthma, heart attacks, etc.

THE FOREGOING PORTION OF THIS REPORT WAS DICTATED IN THE PATIENT'S PRESENCE ON OCTOBER 11, 1963.

Physical Examination:

General Appearance - The patient's general appearance is satisfactory. He looks like a well man and he seems to be frank and cooperative. His appearance is consistent with his statement that he is of partial Cherokee Indian extraction and part Anglo Saxon.
Blood Pressure - Abnormal, consistently elevated to a level of 180 to 200 systolic and 90 diastolic.
Pulse - Normal, 64 and regular.
Temperature - Normal, 98.4°.
Eyes - Pupils are round, regular and equal, reflexes to light and accommodation normal, external ocular movements are normal.
Oral Cavity - No significant findings.
Lymph Nodes - None are enlarged or diseased.
Thyroid - Normal. Breasts Normal. Skin Normal, no cyanosis.
Chest Wall - Shape is within normal limits. Respiratory excursion satisfactory. No tenderness.
Lungs - Percussion note normal, breath sounds within normal limits. No wheezes heard. There were a few basal rales rather coarse and symmetrically distributed on both sides, suggesting pulmonary congestion.
Heart - Size indeterminate, rhythm regular, no murmurs or other abnormalities detected. No distention of neck veins in the upright position.
Abdomen - No enlargement of liver, spleen or kidneys. No abnormal masses palpated. No unusual tenderness.

Electrocardiogram:

Auricular Rate 70, Ventricular Rate 70, Rhythm Sinus, T Waves Normal, P-R Interval 0.16, Q-R-S Interval 0.06, S-T Segment Isoelectric, Position Semi-vertical, Electrical Axis Normal.

REMARKS: Normal record.

Robert O. Goans

(Gerson R. Biskind, M.D. - Medical Laboratory)
Urinalysis:
Color Yellow, Turbidity Clear, Reaction pH 6.0, Spec. Grav. 1.021,
Albumin Negative, Sugar Negative, Urobilinogen (normal pos. 1:10) pos. dir.
neg. 1:10, Epithelial Cells rare sq., RBC/hdf 0, WBC/hdf Occ., Casts 0, Bacteria 0,
Crystals 0, Mucus Threads 0.

Complete Blood Count:
Hemoglobin 97%, 15.0 Gm., Erythrocyte Count 4.98 Million, Color Index 0.97,
Leukocyte Count 9,400, Polymorph. Neutr. 59%, Filamented 58%, Nonfilamented 1%,
Eosinophiles 1%, Basophiles 0%, Lymphocytes 34%, Monocytes 6%.
Rare atypical lymphocytes noted; the red blood cells and platelets appear normal.

Blood Serology:
VDRL - Nonreactive.
Kolmer - Nonreactive.

X-ray Examination of the Chest:
Stereoscopic and left lateral projections show a bony thorax within normal limits. The heart shadow is questionably enlarged and the aortic shadow is prominent. Both hemidiaphragms are irregular in contour and hazy in outline. Most impressive is the fine linear densities extending out from both hilar regions into the base of each lung and some less distinct and coarser strands extending into the right apex. There is a blurring of the right cardiophrenic angle but it is unclear whether this is cardiac or pulmonary in origin and most likely it is a distortion of the cardiac outline produced by pleural changes. IMPRESSION: The appearance is that of diffuse rather extensive and moderately severe pulmonary fibrosis such as is seen in cases of asbestosis. The pleural changes are compatible with this diagnosis.

Tests of Pulmonary Function:
One second forced expiratory volume - 2.2 liters, two seconds 2.6 liters, three seconds 2.9 liters and total 2.9 liters.
Maximal Breathing Capacity - 68 liters per minute.
IMPRESSION: The picture is one of moderate restrictive lung disease with nearly normal air flow rate (175 liters per minute on the spirogram). Such restrictive disease is seen in pulmonary fibrosis, congestive heart failure, etc. The ventilation as measured should be adequate to permit moderate physical activity in so far as such an estimation can be made by these methods.

Discussion and Summary:

This patient has definite elevation of his blood pressure, moderately severe pulmonary fibrosis (presumably asbestosis) and symptoms of reduction in exertion tolerance only recently.

On the basis of our x-ray findings and his history of exposure, it seems probable that the patient has asbestosis.
NOV 6 1963
CIVIL

Page 5: October 14, 1963
From: H. Corwin Hinshaw, M.D.
To: State Compensation Insurance Fund
Subject: Robert O. Goans

Discussion and Summary CONTINUED:

his pulmonary fibrosis has been present for many years, that it is of occupational origin and due principally if not entirely to exposure to asbestos fibers. His symptoms are described as having been of rather recent origin and I suspect that the cardiac stress of his hypertension may have been the recently added factor which has combined with the pre-existing and probably longstanding pulmonary fibrosis to produce the symptoms.

Since Mr. Goans is so near to his normal retirement age, he is eager to remain employed until the age of 65. It is my opinion that it would not be deleterious to his physical welfare to continue working provided he can be assigned to tasks that do not involve inhalation of pathogenic dusts or fibers in the air.

He should be under continuous medical supervision and if the hypertensive trend continues he should probably receive antihypertensive drugs. In the event that these are marked effective in relieving his symptoms, it would tend to confirm the belief that the cardiac aspect of his disability was an important one.

Previous x-ray films have not yet been obtained for comparison with current films.

The most reliable method of analyzing his cardiac and hypertensive status would be to admit him to a hospital for a week or two of appropriate treatment designed to control his hypertension and to relieve any pulmonary congestion produced by this condition. However, the existence of pulmonary fibrosis of occupational origin has been satisfactorily established by present studies, in my opinion.

Very truly yours,

H. Corwin Hinshaw, M.D.

NOV 6 1963 F. LEGAL

LEGAL

January 13, 1964

Mr. John A. Binkley
Legal Department
Employers Mutuals of Wausau
Adam Grant Building
San Francisco, California

Dear Mr. Binkley:

Subject: Robert O. Goans
vs
Armstrong Cork Company, et al
File A27-46462
IAC File 63 OAK 11052

We are sorry that we cannot give you the periods of employment of Mr. Goans from January 1, 1944 to January 1, 1952 when you were an insurer of a portion of our California operations. All of the payroll records prior to 1956 except a yearly plant summary have been destroyed.

You were never the insurer of our contracting operations, however, and this is the area from which the pneumoconiosis stemmed. You insured our manufacturing plant at South Gate. Our yearly plant summary for the period in question does not list Mr. Goans as having been in our employ at South Gate.

We hope that this information will be of some assistance to you.

Very truly yours,

Wallace B. Hofferth
Assistant General Manager
Insurance Department

SLK

Mr. A. L. Stokely, District Manager
Armstrong Contracting and Supply Corp.
304 Shaw Road
South San Francisco, Calif.

Mr. Fred L. Gardner, AC&S, Lancaster

August 22, 1963

Mr. G. H. Finlay
Alexander & Alexander, Inc.
2225 North Charles Street
Baltimore 18, Maryland

Dear Mr. Finlay:

Subject: Robert O. Goans
vs
Lorentzen & Company and
Argonaut Insurance Company and others
Case No. 63 OAK 11052

A hearing on the amended Application of Robert O. Goans is scheduled before the California Industrial Accident Commission on September 16, 1963, in Room 3000 of the State Building, 1111 Jackson Street, Oakland, at 9 A.M. Both Armstrong and Armstrong Contracting and Supply Corporation are named in the Application.

Mr. Goans was employed by Armstrong Cork Company for a period prior to March 31, 1955, from June 21, 1955 to November 2, 1955, and from October 21, 1957 to November 22, 1957. We say "for a period of time" prior to March 31, 1955, because we are unable to determine just how long due to the records being destroyed in accordance with our established retention of records schedule. Even though we have the employment dates for 1955, the records showing the wages earned during 1955 have been destroyed.

Mr. Goans was in the employ of our subsidiary, Armstrong Contracting and Supply Corporation from October 1, 1958, to December 23, 1958.

Please forward this amended Application for Workmen's Compensation Claim to the proper office of The Travelers for handling and protection of our interests.

Very truly yours,

Wallace B. Hofferth
Assistant General Manager
Insurance Department

re: Robert O. Goans vs Lor-
entzen & Company and
Argonaut Insurance Co.
63 OAK 11052

Gentlemen:

Enclosed herewith find Amended Application showing additional employers and insurance companies and we would request these parties to be joined and Notice of Hearing be sent out for September 16, 1963, at 9:00 A. M., in Oakland. As stated by the Referee, this will be a pre-trial conference to get the names of the employers and employment.

With a copy of this letter, I am sending a copy of the Amended Application with a total list of employers and advising that the Hearing is scheduled for September 16, 1963, Room 3000, State Building, 1111 Jackson Street, Oakland, California, at 9:00 A.M. before Referee Witt.

Very truly yours,

SMITH, PARRISH, PADUCK & CLANCY

MELVIN S. WITT, Referee Claim OAK 11052
August 3, 1964 Inj: 4-3-63

REPORT OF REFEREE ON
ORDER APPROVING
COMPROMISE AND RELEASE

Parties have submitted a Compromise and Release of \$6750.00, which is adequate on the record and is being approved payable to applicant forthwith, less \$309.40 payable to Department of Employment in satisfaction of its lien claim, \$300.00 to Smith, Parrish, Paduck & Clancy for living expenses advanced, and \$750.00 attorney fee.

MELVIN S. WITT, Referee

MSW: amm

BEFORE THE INDUSTRIAL ACCIDENT COMMISSION OF THE STATE OF CALIFORNIA
CASE NO. 63 OAK 11052

ROBERT O. GOANS,
Applicant,

v.

LORENTZEN & CO., et al,
and ARGONAUT INSURANCE
COMPANY, et al,

Defendants.

ORDER APPROVING
COMPROMISE AND RELEASE

The parties to the above entitled action having filed a Compromise and Release herein, on July 29, 1964, settling the above case for \$6750.00, in addition to all sums which may have been paid previously, and requesting that it be approved; and this Commission having considered the entire record, including said Compromise and Release, now finds that it should be approved; and,

GOOD CAUSE APPEARING THEREFOR,

IT IS ORDERED that said Compromise and Release be, and it is hereby approved, payable as follows: To applicant, in one lump sum, as follows:

\$800.00 payable by Aetna Casualty & Surety Co., on behalf of Mundet Cork Co., Fiberglass Engineering and Supply Co., and Owens-Illinois Fiberglass Co.;

INDUSTRIAL ACCIDENT COMMISSION

LET THE MINUTES SHOW the stipulation of the parties that the subpoenaed records of St. Luke Hospital and Kaiser Foundation Hospital may be withdrawn by the Defendant for copying.

Continued on page 2 of the minutes of this hearing.

REPORT OF REFEREE

In a preliminary discussion, Mr. Smith indicated that there was employment with Western Asbestos for the period 1920 to 1947, during which Western Asbestos was the sole employer. There are no records by Western prior to 1946 as to employment. Mr. Filippi tentatively will stipulate to coverage by Pacific Employers Insurance Company for the period November 1, 1925, to November 1, 1932. The period of 1920 to 1925 had not been checked, since it was not alleged in the application. Mr. McMillan will stipulate to coverage of Western by the State Fund from November 1, 1932, to date. There is no information regarding employment prior to 1946.

It was agreed that as to Mundet Work Company, all periods prior to 1940 are diminutive. Mr. Neidermiller will tentatively stipulate to coverage beginning December 31, 1938, to 1944, and December 31, 1961, through July 1, 1963. However Industrial Indemnity Exchange insured Mundet December 31, 1943, to 1944, according to Mr. Smith; so the C.I.P.D. records are apparently erroneous. In any event there is no employment claimed during that time during 1943 to 1944.

As to Plant Rubber & Asbestos Works, Pacific Employers will tentatively stipulate from October 1, 1940, to October 1, 1942, for coverage.

As to Plant Asbestos Company, Pacific Employers will tentatively stipulate to coverage from May 18, 1938, to January 1, 1952. Industrial Indemnity Company will definitely stipulate to coverage January 1, 1952, to January 1, 1962. It has no information regarding employment.

As to Army Port Contractors, Associated Indemnity Corp., has no information of coverage of that employer. Mr. Schwab indicated that Fireman's Fund Insurance Company was unaware of Army Port Contractors as having been allegedly insured and this will be checked.

Mr. Schwab stated that California Casualty Indemnity Exchange will definitely stipulate to coverage of C. F. Braun & Company September 21, 1936, to December 1, 1941, and to coverage of Harry A. Dutton, aka Dutton Asbestos Company, November 1, 1952, to November 1, 1958.

Zurich General Accident had one-half day coverage in 1937 and was dismissed, as was Employers Mutual Liability Insurance Company of Wisconsin.

Many of the parties stated they had not had sufficient time as yet to check records regarding coverage and employment in view of the incomplete pleadings regarding dates and places of employment. Mr. Smith indicated that he will go through the entire work history with the applicant today and then send the information to the parties, who are then to advise in writing regarding stipulations as to coverage and employment. Preliminary settlement negotiation is under way.

Apparently the lien claim for U.C.D. Benefits is in connection with an eye condition which is no part of this action.

DISPOSITION: Continued, to be reset on notice to all parties.

HERVIN S. WITT, Referee
