Dr. Lewis J. Cralley
Director of Epidemiology and Field Studies
National Center for Urban & Industrial Health
Public Health Service
1014 Broadway
Cincinnati, Ohio 45202

Dear Lewis:

What is the status of the medical portion of your studies in the asbestos industry? As you know, Pittsburgh Corning Corporation is interested in the U.S.P.H.S. following up on the environmental studies at their Tyler and Port Allegany Plants as soon as possible. We are also awaiting the reports on these environmental studies.

You may remember I indicated to you that prior to U.S.P.H.S. involvement in the Tyler Plant we had discussed with Dr. Hurst, of the East Texas Tuberculosis Hospital, the possibility of their conducting medical studies on the Tyler employees. When it appeared that the U.S.P.H.S. would include the Tyler Plant in the asbestos industry study, we deferred further discussion with Dr. Hurst.

I have attached a copy of a letter recently received from Dr. Hurst which is self-explanatory.

Sincerely,

Lee B. Grant, M.D.

Lee Grant, M. D.
Medical Director
Pittsburgh Plate Glass Company
One Gateway Center
Pittsburgh, Pennsylvania 15222

Dear Doctor Grant:

Although I am a little late, I would like to thank you for the very nice luncheon and visit I had with you during my recent stay in Pittsburgh.

As I mentioned to you, if the U.S. Public Health Service desires, we would be glad to help them on the clinical studies at the Owentown plant.

Sincerely,

George A. Hurst, M. D.
Clinical Director
