Our clients are among the finest and most progressive organizations, firms and businesses in the country. For many, Adrian L. Wallick Company is their first choice for all their refractory installations and/or refractory materials and insulations; they have selected us to complete major projects, while others have chosen us for completion of medium and small assignments.

Here are just some of the various types of heat enclosures we have built, repaired, modified, or supplied refractory materials and insulations for:

METALS:

ALUMINUM - reverberatory, dry hearth, channel
pot furnaces

BRASS - melting and holding furnaces.

COPPER - melting and holding furnaces.

IRON AND STEEL - channel inductions, electric
arc, cupolas, hot blast, soaking pits, regenerators,
ladles, etc.

GLASS MELTING: complete melt facilities or
repairs to tanks, forehearths, regenerators, etc

PETRO CHEMICAL: regenerators, heaters,
reactors, cyclones, stacks, ducts, etc.

COAL GASIFICATION: complete system.

HEAT TREATING: carburizing, salt bath, muffle
furnaces, radiant tube, car type, etc.

RE-HEAT: slot type forge furnaces, rotary hearth,
walking beam, etc.

ROCK PRODUCTS: rotary kilns, vertical kilns,
dryers, trefoils.

COKE OVENS: end wall repairs, floor repairs,
wall repairs, door repairs.

INCINERATORS: multiple hearth, sludge, liquid
waste, municipal, industrial and commercial
sizes.

BOILERS: industrial sizes and utility company
sizes, conversions, repairs, settings.

OTHERS: tunnel kiln, beehive kiln, frit furnaces,
ducts, stack linings, cyclones.
