Mr. W. A. Shumaker	VF P&PG-2B

The Asbestos Information Association prepared the above handbook. Copies have been obtained and will be sent to each plant under separate cover.

The AIA did an excellent job, and I am sure that you will find the handbook a very useful reference.

Additional copies may be obtained at an AIA members' cost of \$10. The ordering information is in the handbook.

FOREWORD

Several agencies within the federal government have become involved in rulemaking for control of exposure to asbestos dust as a hazard to health. Concern with asbestos-health issues has been with exposure to fibers in the workplace, general environment, both air and water, and with consumer products which might, in normal use, result in the "freeing" of respirable asbestos fibers. Several states and some municipalities have issued regulations with regard to asbestos exposure.

Ready reference to asbestos regulations now in being in the United States is provided by this handbook. Following a tab for each federal agency which has issued regulations on asbestos will be found a summary of the regulations, a reprint of the regulations from the *Federal Register*, and a brief history of the agency and its responsibilities. A digest of pertinent state regulations and current regulatory initiatives is also provided. A miscellaneous tab has been included for filing related material. The proposed revision to the OSHA standard published October 9, 1975, appears under the miscellaneous tab.

This publication supersedes AIA/NA handbook, *ASBESTOS, Federal Regulations*, dated September 5, 1975. Single copies are made available to members of the Association without charge. Copies for non-members and additional copies for members may be obtained from AIA/NA at cost of \$16.50 each. Mailing charges will be added outside the United States. Such additional regulations or changes as may occur to affect this reference work will be forwarded to holders without charge. An order form for additional copies of the handbook and for information/educational materials available from the Association will be found following the miscellaneous tab. For additional information please write to the Association.
