DUPONT PRODUCTS

AN ALPHABETICAL LIST

INTERIM EDITION

DECEMBER 1944

BETTER THINGS FOR BETTER LIVING . . . THROUGH CHEMISTRY

FOREWORD

This is an Interim Edition of the "Index of Du Pont Products", which is now in the process of being completely revised for use when materials are again available for general peacetime use. Here is an up-to-date alphabetical listing of Du Pont products, names of the Department or Division from which they are obtained, and the addresses of the Du Pont Company's branch offices. Where practical, product names or their trade-marks have been cross-indexed under major uses and general classifications.

For additional information on the properties, uses, package sizes, and other data on products manufactured by the Du Pont Company, write to the nearest branch office or to the Wilmington office of the Department marketing the product. The addresses of branch offices of the Du Pont Company are shown in the back of this booklet.

When conditions permit, a revised edition of the "Index of Du Pont Products" will be issued. This will furnish detailed information on all products manufactured by the Company: their properties, uses, package sizes, and other information.
