Dear Doctor: Re: Industrial Clinic, Thetford Mines.

After some hesitation, knowing the amount of work you have to perform, I am mailing to you the series of Medical Forms we propose to use in our Industrial Clinic. I am doing so because I know your wide experience in that field and also because I imagine you could manage to have the help of the necessary technical staff.

If possible I would greatly appreciate your comments, your suggestions as far as the essential matter and the technical appearance of these forms are concerned. Also I would like to receive a copy of a form you would recommend to use in any case of Tuberculosis accidentally discovered during our routine work.

The Industrial Clinic in Thetford did progress very slowly in the past but now it looks like we will start operating for good on November 1st.

Be assured that I consider myself very lucky to have your valuable co-operation and in return I would be only too glad to be of any help as small as it may be in a survey or study you would propose to make in Thetford Mines.

Yours very truly,

PAUL CARTIER, MD.
