LOCATION: Paulding

SUBJECT: OSHA/EPA ACTIVITY REPORT FOR MAY 1976

1. Asbestos waste was sent to Flett Development for marketing evaluation on 5/26/76.

2. "No Trespassing" Signs were installed in addition to the caution signs around the asbestos disposal site. These are necessary to deter access by unauthorized individuals.

3. Results of clinical evaluations of 4 employees has been received. No significant findings were noted in reports.

4. Evaluation of dust collector serving Blanchard grinders has been completed. Results to be published in separate report.

5. Additional quotes have been received for modification of existing collector serving the Disc department. Costs quoted range $8,000-$9,000.

6. New respirators were purchased which meet present OSHA requirements.

7. New safety glasses were purchased which provide a better fit, are more durable and are considerably less expensive than previous model used.

   New glasses meet or exceed all ANSI specifications.

8. Received quote on and demonstration of Nilfisk vacuum unit. Demonstration quite impressive. Unit exceeds all dust and noise performance requirements established by OSHA.

   Cost per unit approximately $1,300-$1,500 depending upon accessories desired.

   Paulding requirements to be defined by end of June.

9. All OSHA safety projects listed last month were completed with the exception of the following:

Project	Status
5-2 Replacement of eyebolts on Slab Mill	Scheduled to be replaced this month

PLAINTIFF'S EXHIBIT
MAR-495

MAR 000194

Form No. MC-2053 (Rev. 12/64)

5-4	Repair of vacuum used at #3 Block press	Died - repair cost exceeds replacement cost. Purchase of new unit(s) to be evaluated.

10. No word received as to status of CEA for electrical rewire. (OSHA violation) Time is running out - abatement date is 8/16/76.
