Dear Dr. Kehoe:

Following is a letter received by Sinclair Refining Company at Coffeyville, Kansas, which is self-explanatory:

"I understand you have a lead inspector for this Ethel Gasoline Corporation. If so, I would be glad to get in touch with him somehow as the doctors tell me I have it, have been fighting it for most a year now.

"Most all the doctors tell me I have what they call 'lead poisonin' from this Ethel gasoline. Some information regarding this matter would be appreciated very much.

Very truly yours,

Letter written to Mr. Beach
