Attachments: [Former Opel site in Antwerp is polluted with toxic "forever chemicals" PFAS.pdf](#)

Dear colleagues,

It has been requested during the webex that we share the PFAS local contamination cases. Presently there are projects ongoing in BE regions about the PFAS contamination inventories:

- Please find in annex a very recent case in the former Opel Antwerp industrial site. In several publications it is stated that the remediation cost will be 3.8M€, and it is not certain that it will be paid by industry (presently the regional waste authority is trying to transfer the cost to industry).
- We are collecting data about PFAS from our regions, so if you could explain which data you need exactly, then we could include it in our requests to the regions and also send to you existing reports

All the best,

[REDACTED]

Dear Colleagues, Based on the results of the doodle and internal communications with some ECHA colleagues, I propose the following date for our November webex. Please see webex details below. I am sorry that some of you may not be able to join, but I hope we all manage to keep in touch by emails and shared updates as usual during this rather complex year. I will share the agenda as soon as it is ready. Thanks again for your contributions so far! Kind Regards [REDACTED]
