Karen and Steve,

Dean had these edits to the WHB paper. Let me know if you're good with them or have additional edits so we can send to Patrick.

Couple changes:

B3 insert "to" between "due" and "inadequate"

B4 strike 45,000 and replace with "up"

B6 between "or" and "offered" insert "that have been"

Thanks, Thomas and Dean!!

As you may know, the Department has asks the bureaus to identify topics and prepare briefing papers for the Secretary's budget hearings. Attached below are 25 high level program overview briefing papers we have prepared for OCL. 620 has cleared the papers through the programs and AD800.

Can you please review the papers that have been identified under your directorate and let us know if you have edits by **noon, Tuesday (5/2)**? Please feel free to review other papers that are not identified for your directorate but are of interest. Happy to answer any questions.

Thanks!

Meagan

BUREAU: Bureau of Land Management (BLM)
MEMBER: General Interest
ISSUE: Implementation of S.O. 3349, American Energy Independence

Key Points

- Secretarial Order (S.O.) 3349, *American Energy Independence* implements the review directed by Executive Order (E.O.) 13783, *Promoting Energy Independence and Economic Growth*, focusing on decreasing the regulatory burden associated with energy production.
- In addition, S.O. 3349 revokes S.O. 3330, *Improving Mitigation Policies and Practices of the Department of the Interior*, and directs DOI bureaus to identify all actions taken related to S.O. 3330 and the 2015 Presidential Memorandum, *Mitigating Impacts on Natural Resources from Development and Encouraging Related Private Investment*.
- In addition, E.O. 13783 rescinded several climate change related directives, and S.O. 3349 directs DOI bureaus to identify all action taken related to the rescinded climate change directives.
- Finally, S.O. 3349 specifically directs the BLM to review a number of other agency actions that may place an unnecessary burden on domestic energy development.

Background

- S.O. 3330 established a DOI-wide mitigation strategy through a landscape-scale approach, early integration of mitigation considerations in project planning and design, and considering the durability, transparency and consistency of mitigation measures.
 - Consistent with S.O. 3330, the BLM finalized its interim (June 2013) mitigation policy, incorporating the S.O. 3330 strategy and issuing a Mitigation Manual (MS-1794) and Mitigation Handbook (H-1794-1) in December 2016.
- The Report of the Executive Office of the President of June 2013, *The President's Climate Action Plan* contained three broad goals related to climate change mitigation, adaptation, and international leadership.
 - As directed by the Council on Environmental Quality Guidance that derived from this report and other executive actions, the BLM integrated a more quantitative approach to the consideration of greenhouse gases and climate change into its decision-making and planning processes. The BLM also manages public land to address wildfire, drought, and other issues that relate to adaptation.

Current Status

- The BLM is providing a list of all actions to the Secretary adopted or in the process of being developed on mitigation and climate change since the policies specified in the S.O. 3349 were issued.
- The BLM is identifying all existing agency actions that potentially affect the development or utilization of domestic oil, natural gas, coal, and nuclear energy resources.
- The BLM is following the proper process for rescinding *Oil and Gas; Hydraulic Fracturing on Federal and Indian Lands* and considering if and replacing it with a new proposed rule.
- The BLM is reviewed final rule titled *Waste Prevention, Production Subject to Royalties, and Resource Conservation* to ensure its consistency with E.O. 13783.
