

CONFIDENTIAL

APPLICATION FOR WAIVER OF EMISSION TESTINGVista Polymers
data

If emission testing would be required because of ^{the} modifications mentioned in the attached application, we request that emission testing be waived. We request that emission testing be waived because, as outlined in the attached application, ~~the modifications will not affect compliance with standards outlined in 40 CFR 61.64 and 61.65.~~ No new emission points will be created and no operating procedures will be changed. Since operating procedures are not changing, reactor opening loss and slurry vinyl chloride residuals will not change. Modification will only result in increased hours of operation of the process water strippers and incinerator. Operating procedures for the process water strippers and incinerator have not changed since emission testing conducted May 12 and May 13, 1981. As a result, we request that emission testing be waived.

*the modification will have no effect
on reactor opening loss or stripped slurry
residuals.*
