RE: Your October, 1989 request for a historical document addressing worker exposure vs community exposure to vinyl chloride

Dear Dave:

I am enclosing copies of several current documents that address worker vs community exposure to vinyl chloride.

i) ATSDR Draft Toxicological Profile for Vinyl Chloride, 1988. Chapter 7 addresses the potential for human exposure.

ii) "Effects of Exposure to Vinyl Chloride: An Assessment of the Evidence" Sir Richard Doll. 1987. Hazards to the general population are on pp. 38-40.

iii) ECETOC "The Mutagenicity and Carcinogenicity of Vinyl Chloride: A Historical Review and Assessment" 1988. Chapter 3 addresses exposure of the general public.

iv) U.S.E.P.A. Office of Drinking Water "Draft Criteria Document for Vinyl Chloride" 1984. Chapter VII, p. 13 discusses exposure of the general public.

If I can be of any more assistance, please call me at 202/887-1293.

Sincerely,

Susan R. Howe
Manager
