

1 has made it necessary for OCF not only to expand the
2 Berlin operation again in 1968, but also to consider
3 building a new facility in the Southwest.

4 The only asbestos-free product on the
5 market during the past five to ten years was
6 Multitemp.

7 The first under asbestos, the first question
8 which must be resolved is the use of asbestos as a
9 reinforcing fiber.

10 I think we have covered all of this already
11 and we can skip on.

12 Johns-Manville told us during our recent
13 meeting in Manville, New Jersey, they were surprised
14 we never followed up on our high temperature glass
15 fiber insulation product line, Multitemp. By the tone
16 of the consideration, they seemed to be concerned
17 about this product.

18 If it were to be placed back on the market,
19 it would be the only asbestos-free product available.

20 If asbestos threat is real and is a serious
21 threat to OCF's participation in the high temperature
