Hi Frank—

I'm stepping in for my colleague, Robert Daguillard, who's out today. If attributing, please attribute to "an EPA spokesperson."

EPA has not completed new guidance. EPA is conducting a small pilot test of a draft guidance. Once EPA learns from this experience, we intend to release a draft for comment to the broader stakeholder community and the public in advance of a public meeting on the new chemicals program. EPA expects to hold this meeting before the end of the calendar year

Best,

Tricia

**Subject:** PMNs

Dear Robert,

I am a writer for Chemical Watch working on a story about PMNs and significant new use rules. I am hoping you can answer a couple of questions.

Has EPA finished the new guidance (consultation documents) it is preparing? I understand that the guidance is to be available about now. If not, what is the timing?

Has there been much pushback from the industry or NGOs?

Thanks for any assistance you can provide.
