Subject: MSDS Printable Copies: Parts

Enclosed are updated copies of MSDS of the main classes of parts that are set up to cover our product lines. These include:

- 1) Organic Segment - NAO
- 2) Organic Disc Pad - NAO
- 3) Semi-met Disc Pad
- 4) Semi-met Pad, M/H Truck
- 5) Organic Block
- 6) Low-Met Disc
- 7) Organic Disc - Asbestos

Some thoughts on when and if updates will be needed. I can think of at least two occasions.

First, the material types for each class of parts is listed under the "Edge Code" designation on Page 1 of each MSDS. As new customers come on board and additional formulas are developed, new codes will be needed.

Second, a change in "Hazardous Materials" in the formula class and changes in EPA rules.

Let me know if you need anything else.

A handwritten signature in cursive script that reads "Andris".

Andris
