ASBESTOS FIBER

A review of asbestos uses in the Fabrics & Finishes Department has revealed that we used over 125,000 lbs. of asbestos fiber in 1971.

Two of our car care products, Cooling System Sealer VZ-5708 and Heavy Duty Stop-Leak VZ-5709 contain 7.5% asbestos fiber in aqueous suspension (~30 g. asbestos/can). We presume that eventually some of this material gets drained from the radiators to which it was added and that not all the asbestos stays in the radiator. Do you feel that this product presents a significant risk to the consumer or radiator repairmen?
