

METALS RESERVE COMPANY
JUN 20, 1943

WASHINGTON, D. C.

MEMORANDUM TO MR. T. A. HAMILTON:

V

We have received a letter from Raw Asbestos Distributors which is, I believe, being forwarded to you for your information.

In that letter, Raw Asbestos comments on the present limitations on the quantity of asbestos to be shipped on any single vessel.

You may be interested to note that these limitations have now been changed and that the War Production Board's priority system now permits the loading of a maximum of 1500 tons of asbestos on a single vessel of which 75 tons may be C&G-1 and 300 tons may be C&G-2.
