From my perspective, I don't think Gauke and I both need to attend, particularly because of travel budget limitations. He is closer, so it makes most sense for Gauke to attend and he can fill me in later. I have been monitoring the 'limited industry participation intentions' of the organizers and thought a good way to maximize the opportunity for Shell representation would be for Shan to submit an abstract of this recent Shell facility study. (I would recommend he include some of us as co-authors to legitimize additional Shell attendance, but that is up to him). In addition, every chance I get I am trying to emphasize the expectation of a Shell seat at the table for this important meeting. We know already that Chevron and ExxonMobil will be attending.

Below is a link to the meeting notice.

Patsy,

I was hoping to attend this symposium. However, I did pick up the rumour(?) that the organisers want to limit the attendance from Industry and give preference to scientists from academia or regulatory circles. Have not yet seen official flyers or announcements

Regards,
Gauke Veenstra

Are any of you planning to attend the benzene symposium in Munich in Oct? I would like to attend as the global product steward for benzene (lots of presentations from the Shanghai Health Study), but need to coordinate with the toxicologists.

Regards,
Patsy

Check the web site is my only advice right now, but note the site currently says opportunities to submit abstracts will be available soon. So, we need to be diligent in watching this site. Meanwhile, I will try to get information from Pat Beatty and API.

Stuart,

Do you know where I can submit the abstract? The full paper has been submitted to the journal of Regulatory Toxicology and Pharmacology.

Thanks
Shan
