R. L. Wagner - 1760

The following lots of Pydraul "C" and "E" series fluids have been analyzed for PCBs:

	<u>Early Lot</u>	<u>Recent Lot</u>
Pydraul 30-E	QB-14301	-
Pydraul 50-E	QB-12306	QB-18845
Pydraul 90-E	QB-12210	QB-18110
Pydraul 115-E	QB-11000	QB-15900
Pydraul 29-ELT	QB-11510	QB-18765
Pydraul 312-C	QB-12268	QB-18510
Pydraul 230-C	QB-13100	QB-18800

No PCB's were detected in these Pydraul samples. The detection limit for these analyses was 0.5 ppm. This should fill the gaps in our information as discussed in the J. Davidson memo of July 6th to you concerning recent problems at General Motors.
