Subject: TROY OX SURPLUS INVENTORY - 2042PR AND 2042ATSC

Further to our recent discussions, Rayloc has agreed to purchase the following materials as described below:

BFMD Part No.	Formula	Quantity	Rayloc Edge Code	Price
2042PR	UB	120,000	NRP-11030-FE	\$ 177.05/c
2042ATSC	UC	120,000	NRP-11031-DD	\$ 225.97/c

Rayloc headquarters in Atlanta will notify each of the five other Rayloc plants to order their requirements for these part numbers with their regular orders to Cleveland, Tennessee. As soon as I get an approximate usage by plant, I will forward this information to you. In the meantime, please have Troy restencil the Rayloc edge code as described above and ship all materials to Cleveland as quickly as possible. These materials should be segregated in Cleveland for Rayloc use only.

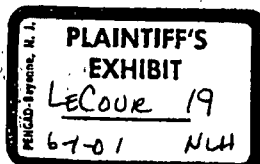

If you have any questions, please give me a call.
