Dr. Grahm Edgar,
Ethyl Gasoline Corp.,
Yonkers, New York.

Dear Doctor Edgar:

I have been referred to you through the courtesy of Mr. E. B. Humm of Stanco Incorporated. I am seeking information regarding the effect of exhaust gas from gasoline containing tetraethyl lead, that is, the physiological effect.

If you can furnish me any references or a bibliography on this subject, or work that is being done, I shall greatly appreciate it. I have occasion to fly airplanes powered with Hornet motors, which are fueled with tetraethyl lead gasoline and this has aroused my curiosity.

I shall be greatly obliged if you can furnish me with any information regarding the inhalation of exhaust gas of this type.

Very truly yours,

Harold R. Bohlman,

HRB/JE.
