REMARKS PYDRAUL A-200--Called today having just heard yesterday that Don Fowler of subject's Medical Department in Detroit had withdrawn his objections to having the Kokomo diecasting plant make a trial with Pydraul A-200.

Bill Oberndorfer was extremely busy during today's call since this firm is currently taking inventory and will not be finished with this chore until Wednesday, July 29. I have an appointment with Bill Oberndorfer on Thursday, July 30, to discuss the inauguration of the trial with Pydraul A-200.

Congratulations are certainly in order for John Hicks, Elmer Wheeler, and Dale Smith for their efforts in getting Don Fowler in Detroit to withdraw his objections to Pydraul A-200 from the toxicity standpoint.

Bill Oberndorfer had heard that approval would be forthcoming, but has not yet received confirmation of this nor the necessary test number.

Expect to finalize test plan a week from today and will advise all concerned.
