Process Description/Notes	
The C.B. Collier water treatment plant consists of chlorine processes as it pertains to disinfecting water to be used for public use. The facility also stores chlorine in 2,000 lb. and 150 lb. cylinders, and keeps a total of 16,000 pounds on site. This amount is divided into two different areas, one with six 2,000 pound cylinders present, and two cylinders constantly being used. The other amounts are kept in a storage or "clearwell" room, as referred to by the facility. The chlorination process at the facility is subject to the requirements of EPCRA Section 302, 312, and 313.
