Cincinnati 19, Ohio

Attention: Mr. Robert A. Kehoe, M.D.

Dear Mr. Kehoe:

Your recent letter of October 8th has been forwarded to me by W. A. Pavlo and we are extremely interested in entering a program which will result in a lower lead incident than we are experiencing at the present time.

Presently we are submitting samples of urine to be analyzed by the lead Dithiazone Method to a commercial Laboratory. Their findings are at times questionable and we would like to have the results of these analyses act as a guide for us to eliminate potential hazards that exist at Price Battery Corporation.

We would like to be informed of the proper procedure for sampling, retaining and shipping samples for this test, in addition to having an idea as to the cost for a consultation program which will supply us with information in order to lower the potential lead problem at Price Battery Corporation. Normally, we would have approximately six to nine samples to be sent out monthly.

Your advices on these matters will be greatly appreciated.

Very truly yours,

PRICE BATTERY CORPORATION

A. R. Judd, M.D.
